Checkpoint 13 Week 17 - Jaap

12-01-2023

Todorov, Martin M.T. 22 minutes ago

I had finished everything, except for some statistics and updating my user stories(changing the ones that are left, which are only statistics, to "finished"). I had finished my docker as well, but the teacher advised me to do some research on what exactly is inside the Dockerfile!

Describe what goes well according to your teacher, what you should pay more attention to and what is your next step to achieve the learning outcomes...

Checkpoint 12 Week 16 - Jaap 22-12-2022

Todorov, Martin M.T. 4 days ago

At the time I had implemented websockets and showcased them, however it was just via sending an alert message to the other side without a proper UI. I had finished my OWASP report and other documentation. I had to work on adding statistics for the admin, docker, more unit tests and improvements to the application!

Checkpoint 11 Week 15 - Bart 14-12-2022

Todorov, Martin M.T. 23 days ago

I had added more functionality to my application, more unit tests, however i need to finish my OWASP report and hadn't yet implemented websockets!

Checkpoint 10 Week 15 13-12-2022

Geurts, Jaap J. (Teacher) a month ago

You really have to work hard and deliver now. Make sure to put extra effort in over the Christmas holiday so that you may be able to catch up before the end of the semester. Don't forget to show your progress regularly to teachers for feedback. Don't forget to fill in feedpulse.

Checkpoint 9 Week 14 - Jaap 08-12-2022

Todorov, Martin M.T. a month ago

- What have I done until now

I have done most of my documentation and worked on implementing more of the user stories

- Impediments / things that I have ran into

Fortunately, I didn't have any issues in particular this time besides some bugs while coding

- Feedback from the meeting

I need to work on my missing documentation (OWASP) and implement web sockets into my application

- What I am going to do

I am going to continue working on my app so I can deliver everything before the end of this sprint

Checkpoint 8 Sprint 4 review - Bart 30-11-2022

Todorov, Martin M.T. a month ago

I had improved my application and made use of converters because I didn't until this point. I need to do a flow diagram for my CI/CD because the current one I had wasn't correct. Also I should add feature branches in git and merge them with the main(or add git labels). I have to indicate which user stories are completed in the documentation and I also have to test the unhappy flow!

Checkpoint 7 Week 12 - Bart 23-11-2022

Rabeling, Bart B.T. (Teacher) 2 months ago

First week in the Netherlands since we started. Pretty far in catching up! Keep it up!

Todorov, Martin M.T. 2 months ago

- What have I done until now

I improved my application and documentation and finished some of the user stories!

- Impediments / things that I have ran into

The authentication and authorization are probably the hardest so far due to the webSecurityConfigurerAdapter being deprecated

- Feedback from the meeting

I need to improve my DTO usage and conversions in the controller layer so that it is completely separated. I have to make a test plan and update my documentation on which user stories are already completed.

- What I am going to do

I am going to work on the feedback that I received and also make my UX report as I am missing that! I will also continue working on my application

Checkpoint 6 Week 11 - Jaap 17-11-2022

⚠ No feedback submitted.

Geurts, Jaap J. (Teacher) 2 months ago

Student is catching up. DB/Backend/frontend connection is working round trip. Design document needs work (currently only C4 model diagrams. UML class diagram missing. Solid explanation missing. Research document needs improvement. Provide better structure by applying the DOT framework. Sonarqube is WIP.

Todorov, Martin M.T. 2 months ago

I need to improve my documentation(C4 component UML, "How is solid guaranteed" document and research document) and work on finishing SonarQube! I will do that and present it on my meeting next week as well as improve my application!

Checkpoint 4 Week 9 - Jaap 03-11-2022 ▲

Todorov, Martin M.T. 2 months ago

I completed my documentation where I had issues (user stories, missing prioritization, missing story points, C3 document etc) and front and back end are connected and working. I had an issue with Apache ports which my teacher helped me to resolve. I am going to continue working and present a better application next week!

Checkpoint 3 Week 8 - Jaap 20-10-2022 ▲

⚠ No feedback submitted.

Geurts, Jaap J. (Teacher) 3 months ago

Student still behind on code. Has frontend connected to backend. React in experimental phase.

Backend looks good. No Database connection yet (WIP). User stories are incomplete (both in content and amount) keep working on catching up.

Checkpoint 2 Sprint 2 review 12-10-2022 🚹

Rabeling, Bart B.T. (Teacher) 3 months ago

Student is behind on the documentation, esspecially design document and project plan, and coding the front- and backend applications

Rabeling, Bart B.T. (Teacher) 3 months ago Please copy and answer the following questions:

- What have I done until now

- Impediments / things that I have ran into

- Feedback from the meeting

- What I am going to do

Todorov, Martin M.T. 3 months ago

- What have I done until now

Until now I have made a project plan, which I need to improve based on my feedback, my research document, front-end with react and routing, CI/CD and back-end which currently has an issue. Front-end and backend are not connected yet, due to a bug that I ran into and my intelliJ project cannot start.

- Impediments / things that I have ran into

I have mostly ran into bugs after the switch from C# to Java, but I have managed to find a solution for most. Currently I do have a bug which I think I know how to fix now.

- Feedback from the meeting

I need to improve my documentation. In my project plan I am lacking document versioning, prioritization, estimation using story points, more user stories and acceptance criteria, and authorization - different types of users and some aggregated data. I also need to request more meetings

- What I am going to do

I have started working based on my feedback and I aim to have everything done and a working prototype until next week. I will also request meetings every week like I had to do so until now as well

Checkpoint 1

Week 5 - Jaap 29-09-2022

Geurts, Jaap J. (Teacher) 4 months ago

Student is behind on application; documentation and CI/CD

Todorov, Martin M.T. 3 months ago

I was behind on my individual project and had an issue with CI/CD, which my teacher helped me with. I need to ask regularly for feedback in order to become more efficient in my study.
